Subject: Voluntary Evacuation Order - South 4 Group Fire 21:45 on 120419

Winds continue toward the west. Air monitoring concentrations for 1,3-Butadiene continue to be measured in the community over the last hour with a maximum of 5.0 ppm, average 1.031 ppm from 27 detections by TPC. Over the last 7.75 hours since 1400 hours, the 1,3-Butadiene measured detections average 1.79 ppm from 196 detections with a maximum of 12.09 ppm in the community. TPC is working to repair/replace the relief valve on the tank (25), and continues suppressing vapors utilizing a water curtain.

The Judge plans to issue a voluntary evacuation order for the city of Port Neches shortly.
